John Huchism who acted for mes Thompson claimed the entire tract and claimed to have exercised the rights of ownership up to a vent date when me Huys Took passession who also claimed all the leathorn land and had a deed which included the leathour and part of this high ground on the West. In 1856 g. m H Allism owned the stire entire tract shown in the map He deeded to his brother John It Allism all except bounded on the north by Main st on the East + mutte by W. Nines He then had a right to fix the boundaries as he pleased between this and his brother. He finally rold the remainder bounded on the East by a bayester. The discrepancy between there deeds and me Huys deal is very apparent I did not therefore consider me Hays dech as authority the evidence received to show that wither of the Allieons paid any attention to the leathon as it ewas under water mostly. Recently it became dry enough to culmate. The evidurion as to where line was rested, record as to title and or al widence and ingravoluminous. I decided that litigation evas mevitable and The court would likely cleeide against any line I might run for the evidence the Court would get would be different from what I had be onsequently I told Mr Huchism to take the case to court I me wide the moisted on a survey, and although I have studied the case and heard in bourt it has not reppetited to me how any surveyor or court can determine where the lim should be on the east of Thornto ery with any certainty. A second survey ordered by the court fixes the line on the west of the bottom
